

WINTERGREEN COUCH

Queensland's Favourite Lawn

Bright green. Tough as nails.
Built for the Queensland sun,
rain & heat.

Wintergreen Couch is a
premium hybrid couch grass
(*Cynodon dactylon*)
specifically cultivated for
South East Queensland's
climate.

It thrives in our hot, humid
summers, handles heavy
seasonal rainfall, and keeps
its stunning bright green
colour year-round — even
through cooler winter months.

Wintergreen is the go-to
choice for family homes
across Bundaberg, Wide Bay
– Burnett Regions

Main Benefits

Bright Green Colour Year-Round Vibrant, eye-catching green that holds colour well through summer heat and winter — no dull patches.

✓ **Excellent Drought Tolerance** Deep roots and efficient water use make it highly drought-resistant once established — perfect for QLD water restrictions and dry spells.

✓ **Fast Recovery & Hard-Wearing** Handles heavy foot traffic, kids, pets, and backyard play with rapid bounce-back. Ideal for active Queensland families.

Ideal for

- Family homes & backyards
- Poolside & entertainment areas
- Kids & pet-friendly lawns
- Sporting fields & parks
- New housing estates

Full-sun positions across SEQ

Quick Care Guide

Water deeply but infrequently once established

Mow regularly during peak growing season (spring/summer)

Fertilise 3–4 times per year with a balanced lawn food

Rinse after heavy rain to prevent thatch in humid conditions

Avoid heavy shade — best in full sun positions

Fast Facts

Type: Hybrid Couch (*Cynodon dactylon*)

Leaf: Fine to medium — soft texture

Mowing height: 15–40 mm (25–30 mm ideal)

Sun requirement: Full sun (6+ hours daily)
